

Design your concept

HackadayPrize Challenge One

All problem solving starts with an idea or design concept to lead the way and provide direction for your design decisions. In 2015 we called upon you to come up with Hackaday Prize ideas in words, and many new ideas were generated.

In 2016 we've made it easy to upload files and now we want to see your ideas in words and pictures, a Design Concept. The Design Concept is the idea, it's how you think about your project, it's how you go about planning to solve the question you want to solve. It's how you use your logic and creativity to move your design forward.
