

challenge 1

SCOTT

A wrist-worn survival tool that contains all the basic survival knowledge and more

SCOTT is a project that utilizes all of the recent advancement of technology to reconnect you with the bare essentials of our instincts - Survival in any environment.

Our core philosophy is that with correct knowledge and guidance, you would be able to survive and thrive in almost any environment, learning necessary skills that our forefathers had relied upon in order to get us to where we are.

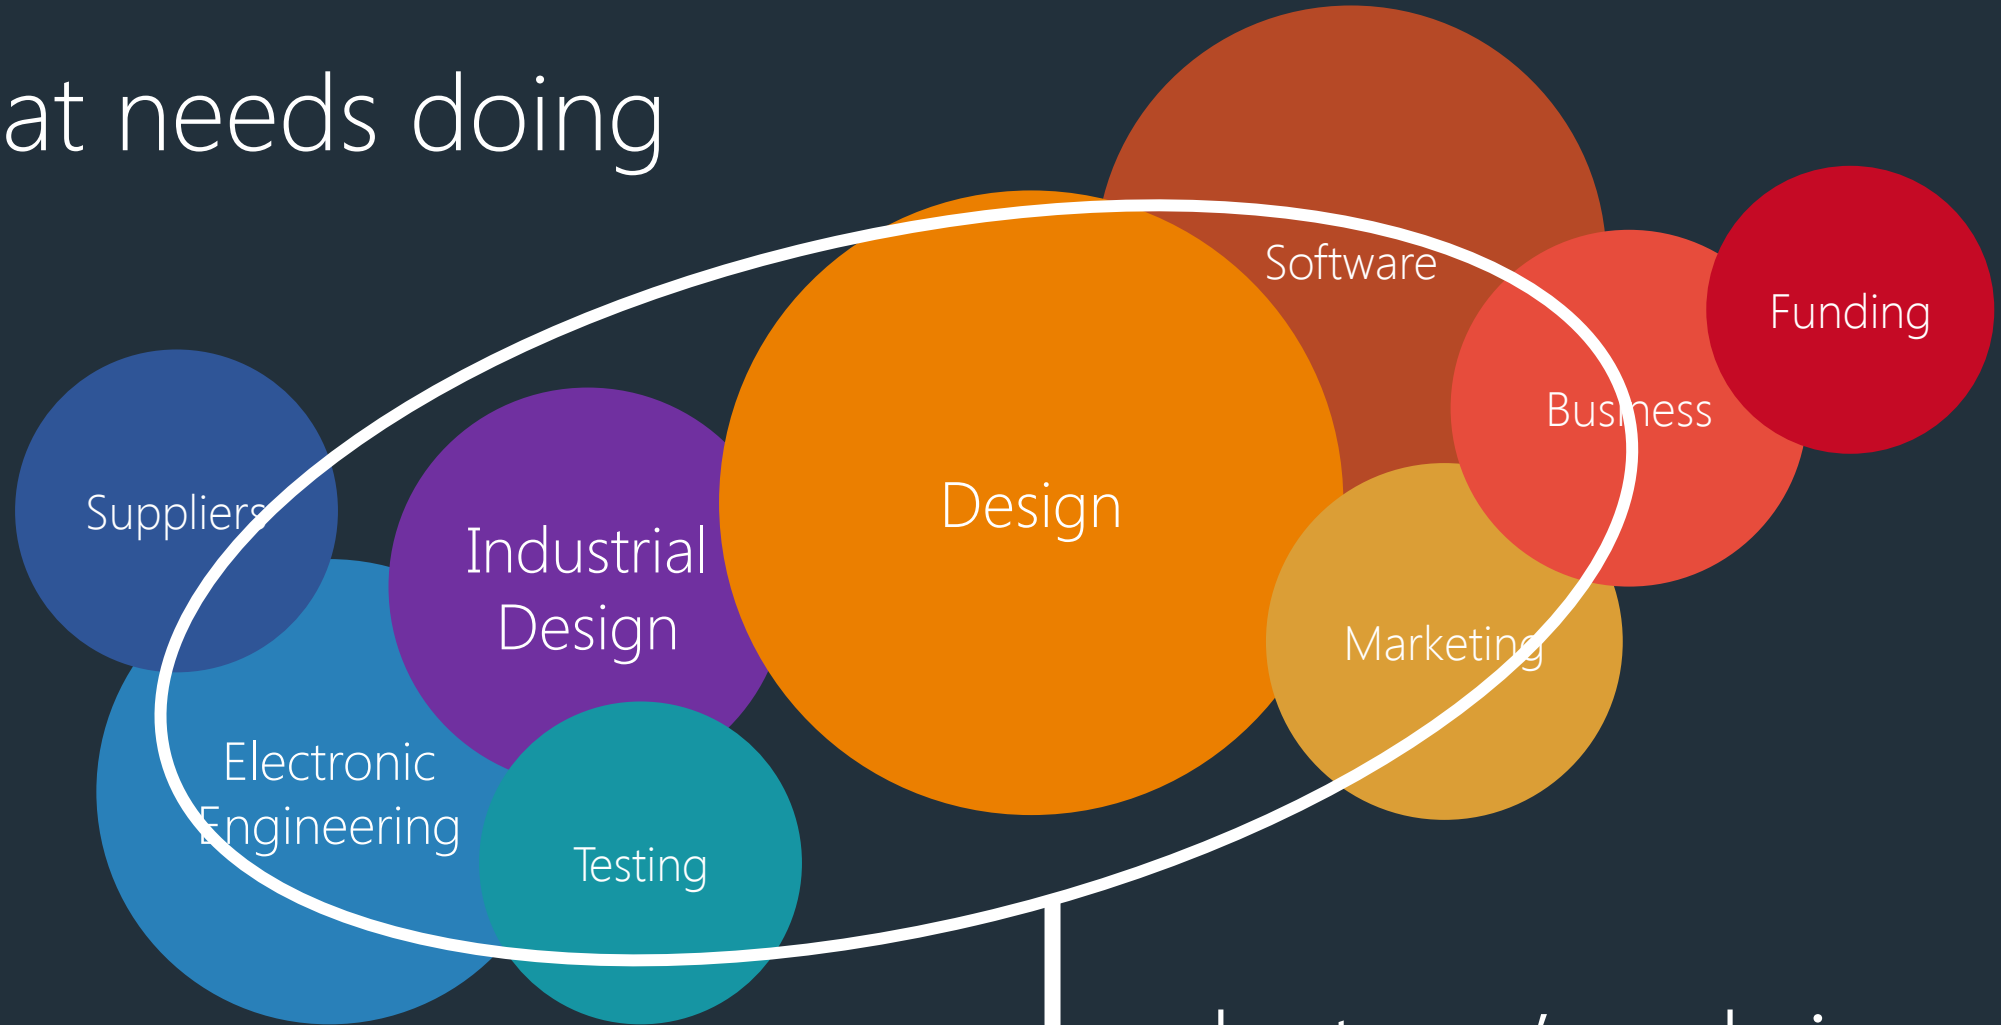

70% Software

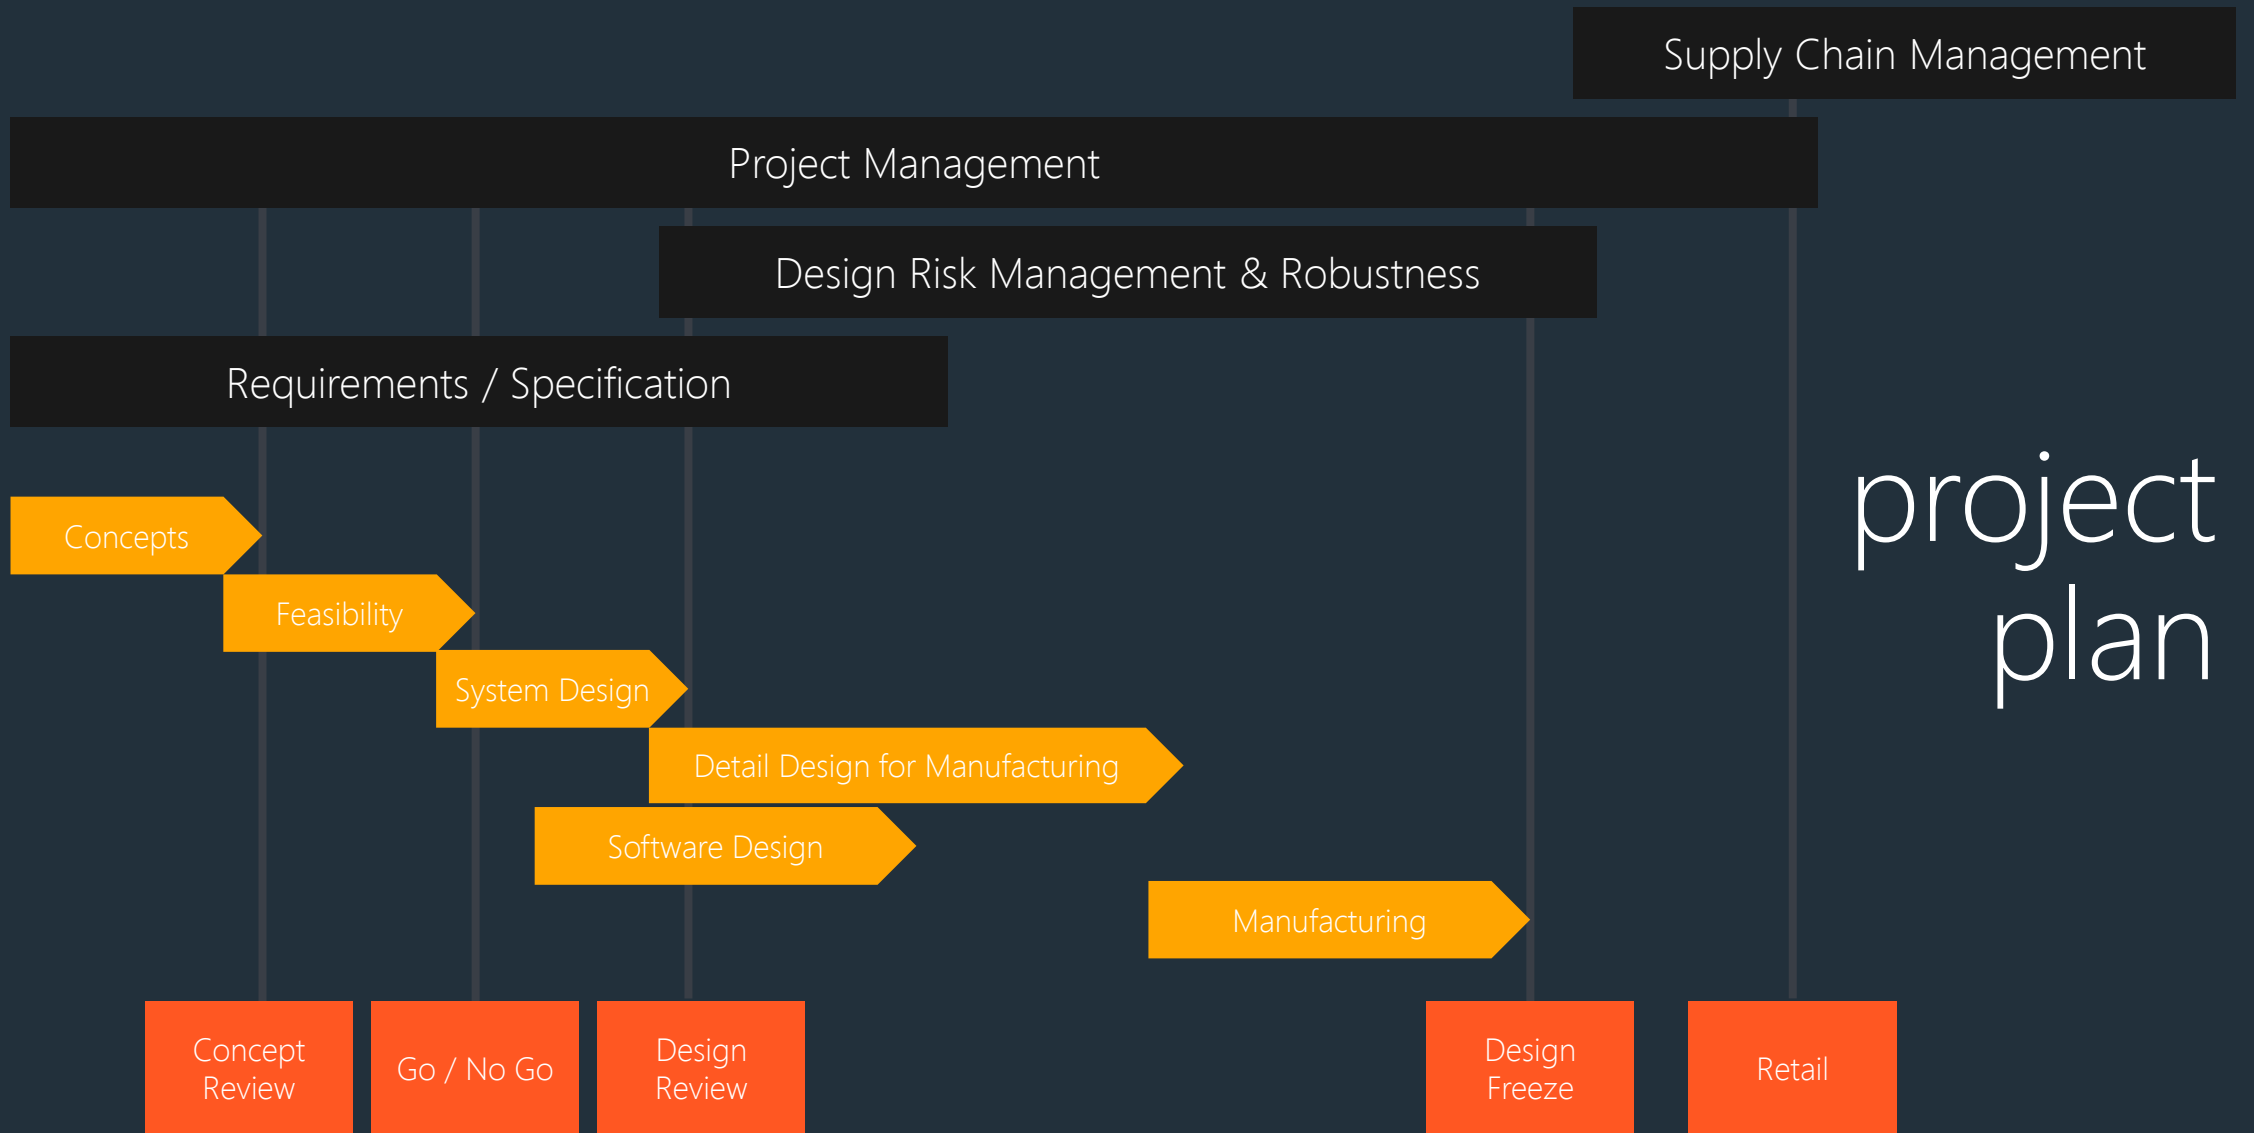

30% Hardware

what needs doing

what we're doing

currently we're...

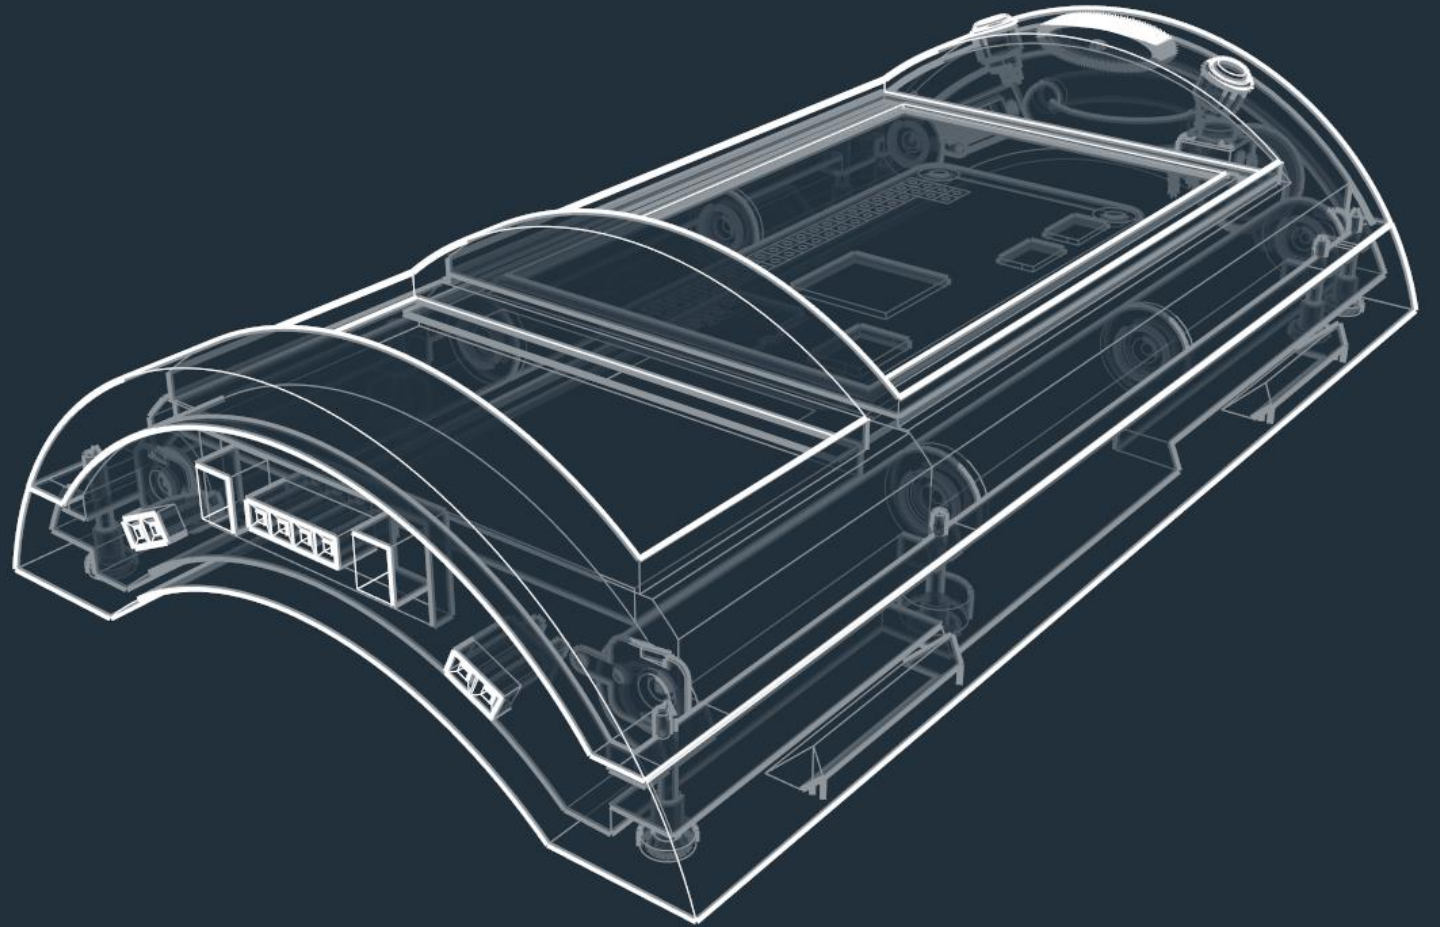

Working on the first Prototype:

3D Printing

Preparing the software

Preparing the components

3D Printing at University

next steps

Installation of Components

Testing

Review
