

Base(s) controlled by other ASMV to create random timing effects

Timbre

Tempo

One-shot timer

2-stage amplifier

Out to speaker  
150 ohm works best

Turns amp on/off  
(low BG noise  
between chirps)

Adapted hi-hat / Snare filter  
by Tiny Dazzler Electronics  
<http://electro-music.com/forum/post-324409.html>

Make adjustments in presense of other circuits  
Sensitive to changes in capacitance  
Intermittent rattle sound
