RAVPower - Stay Powered

RAVPower is the one-stop power charging solution for millions of customers from around the world. Leader in fast wireless charging thanks to our groundbreaking HyperAir technology, a variety of portable chargers and charging accessories provide a reliable way to stay powered anywhere, anytime.

Product Description

We've built our latest portable charger with the latest innovation in charging technology – Power Delivery. Compatible with almost all Type-C devices, it utilizes USB-C Power to power up at an impressive 45W. Compact in size, it's designed with advanced safeguards and packed with a mammoth 20100mAh capacity to recharge your everyday devices. When it comes time to recharge the power bank, use the 30W USB C port to get a full recharge in just 3.5 hours, our fastest recharge yet.

Reviews

★★★★★ (5 Score)

Charges my 15" MacBook Pro Touchbar and iPad Pro 11 just fine.

★★★★★ 5

Anthony L. 2018-12-18

Not sure what the other reviewer is talking about regarding pushing the button. Mine immediately starts charging any USB-C device. Per the attached screenshots, I am getting A for @42W while charging my MacBook with the Apple USB-C charge cable. Data provided by iStats Menus. Some of you may recall my review of RAVPower's earlier and USB-C PD battery bank. Well that now charges unreliably via USB-C, instead it keeps switching to being charged by my device, and yes I have held the button for 5 seconds
