

Face shield assembly instructions

Refers to version 2 available [here](#).

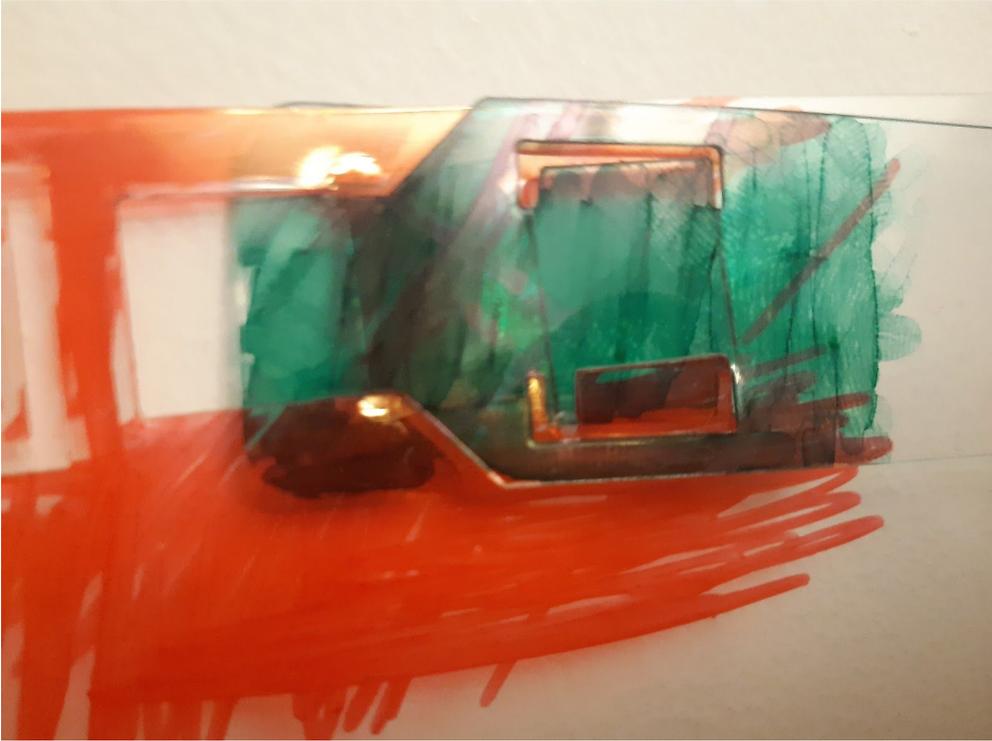

1. After cutting on the laser, 4 elements should appear:

2. First mount the front strap (2) to the visor (1). Make sure that the slightly sloped wing is at the top (marked with "!"):

3. Then lock the belt using the second hook by first inserting the lower wing:

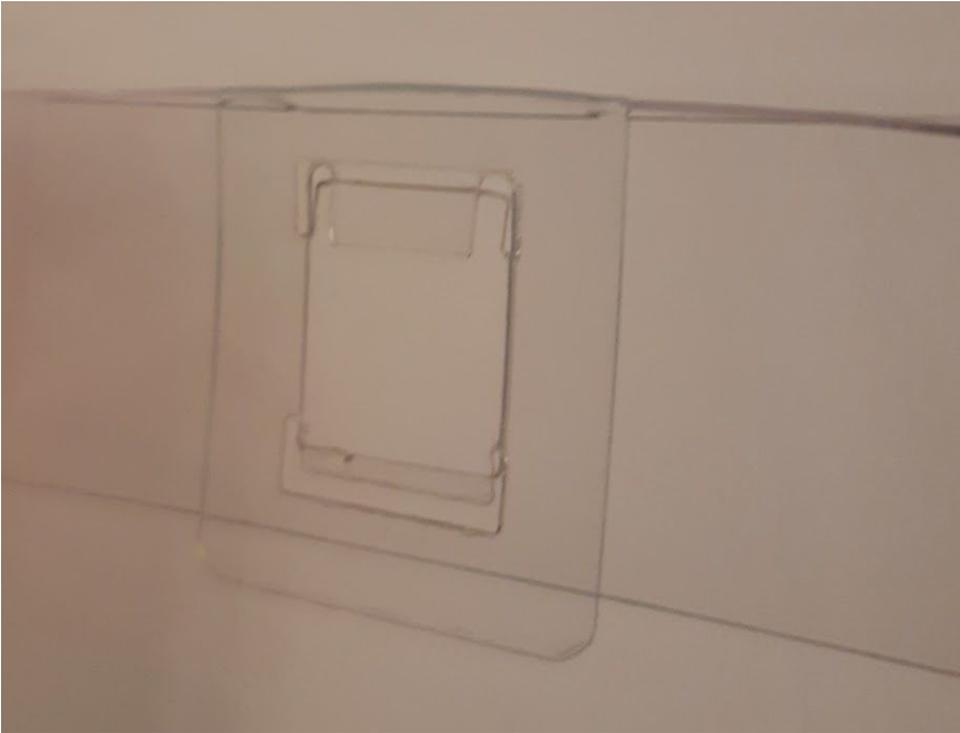

4. And then the upper wing:

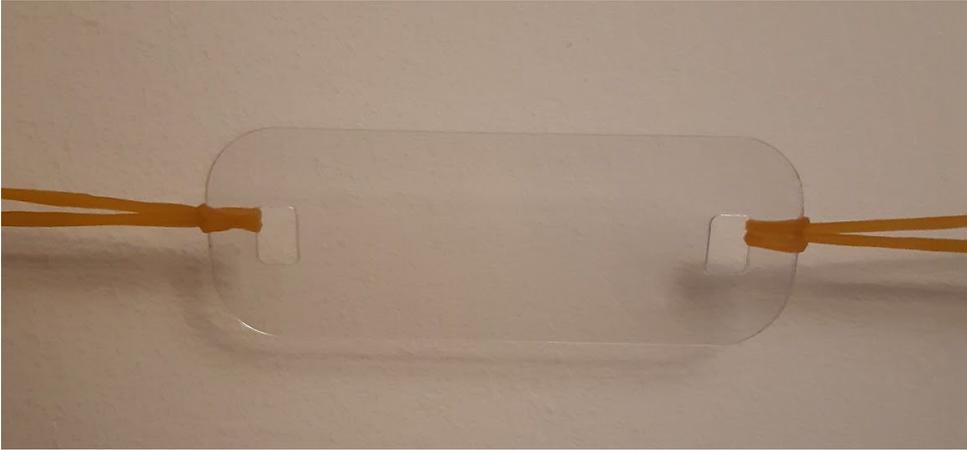

5. At this stage shield should look like this:

6. Then mount the peak (3):

7. Then attach the rubber bands to the rear plate (4):

8. At the last stage, attach the rubber bands to the visor:

9. Assembled face shield:
