

## Battlab-One

## **Quick Start Manual**

Thank you for purchasing the Battlab-One! This guide should help you find the necessary software and support for your new Battlab-One.

The executable application software can be found on my Github site here:

https://github.com/petersdw1/BattLab-One

1. Look for the Latest Release and click on the Zip file:

42 commits 🐉 1 branch 💿 3 tags	A New Tool for Estimating Battery Life for Your Next Internet of Things Project	BattLab-One_Production_Version_1.01
18 hours ago		10.1
9 hours ago	L Readme	Battlab-One Production Rev 1.01
9 hours ago	Releases 2	
20 hours ago	Battlah-One Productio	Assets 3
20 hours ago	8 hours ago	Battlab-One_Production_1.01.zip
20 hours ago	+ 2 releases	Source code (zip)
20 la		Source code (tar.gz)

- Once you've downloaded the Zip file, un-compress it to the location you choose. The Battlab-One application is the .exe file. The un-compressed folder should look like this:
  - SOC\_profiles
  - BattLab\_One\_V1.01.exe
  - abbirdlogo.ico
  - bbirdlogo\_png1.png

**NOTE:** The SOC\_profiles folder <u>must</u> be present and contain the State of Charge (SOC) .csv files for the batteries you intend to use. Bluebird Labs will be updating these from time to time so please check the website for newer profiles at <u>www.bluebird-labs.com</u>.

3. Plug in your Battlab-One hardware using a Type-C to Type-B USB cable and launch the Battlab-One executable. You should see the connection status and COM port that your Windows device chose for the connection as shown below.

Battlab Conn	ected(CO	M41)
COM41 ~	Refresh	Connect

If you forget to connect your Battlab-One with the USB cable you will see this:

Not Connected	Đ.	
~	Refresh	Connect

To get connected:

- 1. Connect your Battlab-One to your computer with a Type-C to Type-B USB cable
- 2. Click the Refresh Button
- 3. You should see a new COM port listed in the drop-down menu (usually the last one in the list)
- 4. Click the Connect button. You should now see the green connected status and COM port as shown above.

You are now ready to start estimating battery life for your IOT projects!

Should you need support, you can submit issues/questions on the support link below.

https://bluebird-labs.com/support/

Thank you again for purchasing the Battlab-One and enjoy!
