

3.2V 280Ah 4000Times
Li-FePO4

Weight: 5277g
Size: 20*17.4*7.2cm

To use a single 250A Daly BMS with
16S2P array, see bottom arrangement.
250A @ 48V = 12kW, no need to go
bigger or separate BMS for parallel bank.
Not sure if you can parallel two BMS's
anyway.
