

## **Apollo Crawler Cab – Assembly Instructions:**

There are two Cabs at opposite ends of the crawler. They attach to the outside of the truck arms. The sides are the same. The cab consist of the following parts. Note the part count is for one cab.

- 1 – Cab Bottom
- 1 – Cab Front
- 1 – Cab Rear
- 1 – Cab Top
- 1 – Cab Side Inner
- 1 – Cab Side Outer
- 1 – Cab Chairs
- 1 – Cab Console
- 1 – Grated Floor
- 1 – Inner Supports
- 1 – Under Cab Cable Tray

The assembly is pretty straight forward. The Cab Rear wall has an A/C window unit. After painting this part the light grey, I hand painted the end and sides black for more realism. The chairs and console should be painted something other than grey. The under cab cable tray should have wires added.
