

Sonoff Basic

Supplier: <https://www.itead.cc/smart-home/sonoff-wifi-wireless-switch.html>

Tasmotta software: <https://github.com/arendst/Sonoff-Tasmota>

Garage sensor:

- 1 Flash with your ino
  - a. <https://hackaday.io/project/25090-garage-door-sensor>
    - i. on your sketch I changed as follows:
      1. # USING SONOFF ULTRASONIC\_TRIG\_PIN 14
      2. # USING SONOFF ULTRASONIC\_ECHO\_PIN 13
  - b. connect sonoff:  
[https://www.google.ae/search?q=flash+sonoff&rlz=1C5CHFA\\_enAE739AE739&source=lnms&tbm=isch&sa=X&ved=0ahUKEwj9e68xtnZAhUEzaQKHe8qCYcQ\\_AUICygC&biw=1920&bih=983#imgsrc=eK54cvqmtR9OZM](https://www.google.ae/search?q=flash+sonoff&rlz=1C5CHFA_enAE739AE739&source=lnms&tbm=isch&sa=X&ved=0ahUKEwj9e68xtnZAhUEzaQKHe8qCYcQ_AUICygC&biw=1920&bih=983#imgsrc=eK54cvqmtR9OZM):
  - c. set up IDE: <https://github.com/arendst/Sonoff-Tasmota/wiki/Arduino-IDE>
  - d. flash
- 2 Some soldering: See below pictures
  - a. Solder to GPIO14 on Sonoff
  - b. Solder to GPIO 13 on Sonoff (led light between light and black push button)
  - c. Solder to ground (black cable next to relay)
  - d. Solder to 5v (there's no 5 v pin, so you have to solder to D5 on board reverse)
- 3 Connection:
  - a. 5v to VCC
  - b. Ground to Ground
  - c. GPIO14 to trig
  - d. GPIO13 to echo

5v connection
